The paragraphs below summarize the recent activities of various national and international committees involved in UI standards development, as of mid-May 1992. Most of the information was gathered at ISO and ANSI standards meetings held in Monterey just prior to CHI'92. Additional updates were provided by Ken Holdaway of IBM and Beth Marshburn of AT&T Bell Labs. As always, I encourage anyone with information about other relevant standards activities to contact me directly so I can include th ...

In this paper we describe how we are using the Hy⁺ visualization system to visualize the portion of the World Wide Web explored during a browsing session. As the user browses, the Web browser communicates the URL and title of each document fetched as well as all the anchors contained in the document. Hy⁺ displays graphically the history of the navigation and multiple views of the structure of that portion of the Web. Queries of the visual query language GraphLog can be issued ...

28 1990 EC directive may become driving force

Pat Billingsley

January 1993 **ACM SIGCHI Bulletin**, Volume 25 Issue 1

Publisher: ACM Press

Full text available:  [pdf\(572.84 KB\)](#) Additional Information: [full citation](#), [abstract](#), [citing](#), [index terms](#)

Amid the political turmoil surrounding the establishment of the European Economic Community (EC), a relatively unknown EC directive has assumed a growing importance for vendors of computer hardware and software. In May 1990, the Council of European Communities issued Directive 90/270, which lays down "minimum safety and health requirements for work with display terminals." The Annex to the directive states that, among other requirements, software must be suitable for the task, easy to use, and a ...
